WZOOM Join with Meeting ID

If you don't have a link to a meeting, you can open your WZOOM Application and enter the meeting ID directly on the App to join.

1

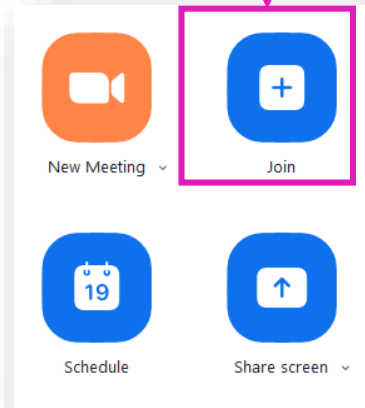

The Meeting ID is a nine digit number shared by the meeting host.

2

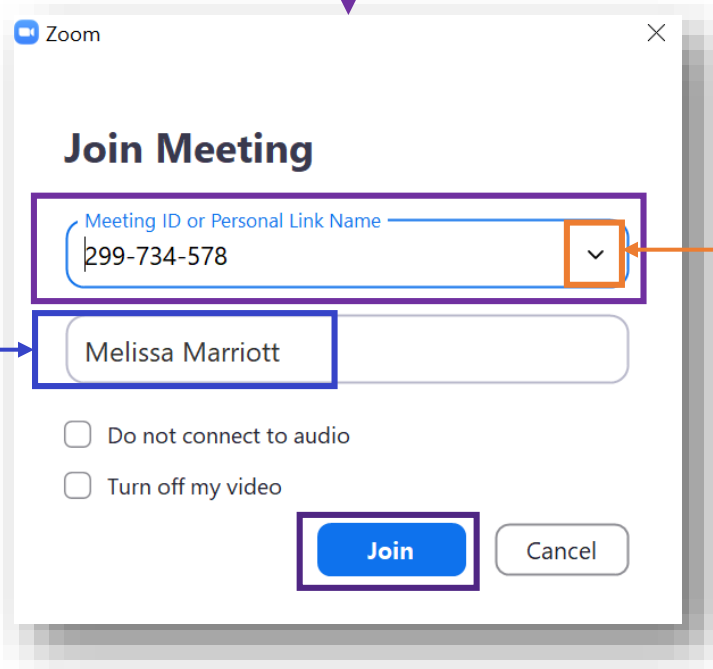

Click on the **WZOOM icon** at the bottom right-hand corner of your screen to open the App

3 From the Home screen, click **Join**

4 Enter the **9 digit number** in the Meeting ID field. When you do this the dashes will automatically populate so you don't need to enter them. **Join** will become **highlighted in blue** when the number is complete

5 Click on the **drop-down arrow** to see a list of previously used Meeting IDs and Personal Link Names

Your name will automatically populate so you can be identified when you join the meeting
